Top Skills

Business Intelligence & Data Visualization (Tableau, Power BI) | Data Analysis & Reporting (SQL, Python) | Microsoft suite of applications | Cross-functional Collaboration & Stakeholder Communication

Technical Projects

- **Analysis of online customer activities and transaction logs in an e-commerce company to derive business metrics.**

As part of this project, we analyzed to create conversion funnel to track number of users finally reach the purchase stage. Worked on multiple metrics like retention rates, cohort analysis, conversion funnel to provide data -driven recommendations to increase retention rate of customers.

- **Data visualization for analysis of sales, returns at a superstore using tableau.**

As part of this project, we analyzed the cause behind the higher return rates affecting superstores' sales and profit. With the help of visualizations, we found out the peak season, and the regions contributing to highest returns. Suggested possible cause for returns and steps to reduce return rate.
